

Hand-Held Touch Screen Pendant

Hand-Held Touch Screen

Hand-Held Pendant With 7 1/4" x 9 3/4" Color Touch Screen

For Chassis dynamometer applications, DynPro includes a Hand-Held Pendant for easy and complete dynamometer control from the cab of the vehicle. The Hand-Held Pendant provides the dynamometer operator with a color display touch screen graphical user interface. All the screens, all the functions and all the capabilities of DynPro are equally accessible through the PC or the Hand-Held Pendant. The only difference is that the Hand-Held Pendant incorporates a touch screen interface versus the traditional point and click of a PC.

For engine dynamometer applications, the Hand-Held Pendant is an optional Accessory. The Hand-Held Pendant allows for convenient and easy test set-up from within the test cell.
