Recommended Accessories

- Base Kit
- Driveshaft
- Shaft Guard
- Engine Cart
- Adapter Plate Kit
- Charge Air Cooler
- Load Bank Configuration (Regenerative Drive Configuration is standard)
- Calibration Weights

For overhung loads, such as a belt or gear drive, please contact Dyne Systems to ensure that the system will meet the required performance needs.

As a safety precaution, Dyne Systems recommends a torsional analysis to uncover any potential torsional problems that exist for each application. This analysis will identify any torsional issues (frequencies) that should be fixed prior to operation. Excessive linear vibration may also create problems that must be mitigated for continued operation. It is the customer’s responsibility to ensure that these vibration issues are addressed upon application of the dynamometer. Equipment failures attributed to linear or torsional vibration are not warrantable.

Everything you need to succeed
Optional Accessories

- Optional Closed Loop Cooling Center
- Optional Charge Air Cooler
- Optional Engine Cart
- Optional Driveshaft Guard

Various Facility Support Systems and Services Available

- Bulk Fuel Storage and Distribution
- Coolant Storage and Distribution
- Water Recirculation
- Design, Project & Construction Management Services
- Commissioning, Start-up & Training
DA100 (US Customary)

DA100 (S.I.)
