Calibration Weight Kit

Taylor Dynamometer's Calibration Weight Kit allows for accurate readings every time you calibrate and it takes only seconds to add and remove weights.

The Calibration Weight Kit key features include:

- Weights meet National Institute of Standards and Technology Class 6 tolerances
- Snap shackle makes adding and removing equipment simple and easy
- All of the hardware included attaches to your current Taylor Dynamometer calibration arm
- Set up time is less than 5 minutes

Everything you need to succeed
