

Rebuild, Remanufacturing and Repair Services

Before, during and long after the purchase, the people of Taylor Dynamometer stand behind their products and services providing complete confidence in and accountability for superior performance. Taylor helps customers get the most out of their testing equipment over its entire life cycle.

■ Rebuild and Remanufacturing Services

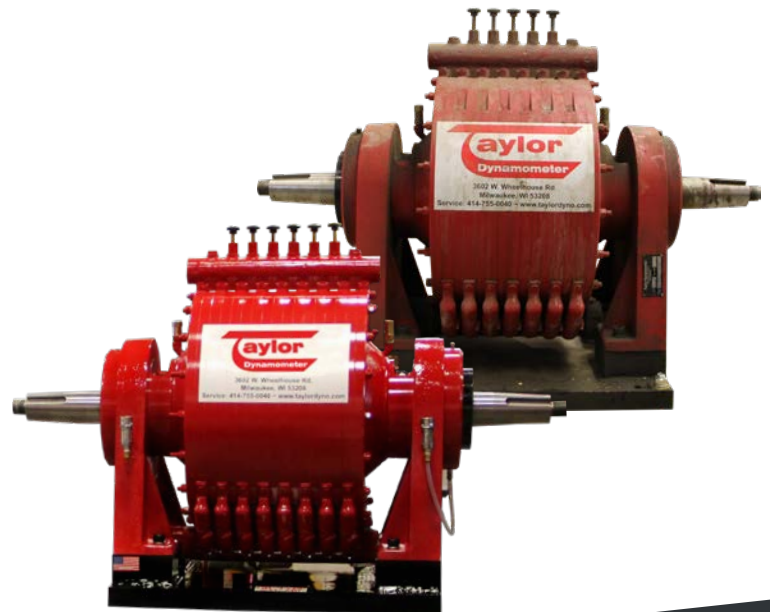

Taylor Dynamometer's proven rebuild and remanufacturing capabilities provide quick turnaround on all dynamometers, equipment and accessories limiting your overall downtime. With a standard turnaround time of 6 to 12 weeks for dynos, Taylor remanufactures your equipment to a "like-new" condition and provides our standard warranty on all complete remanufacturing projects.

Rebuild and Remanufacturing Process:

- inspection of all components
- cleaning
- sandblasting (as required)
- balancing
- factory testing
- painting
- labor and all required parts

■ Repair Services

Taylor can repair broken or damaged parts on most Taylor Dynamometers, equipment and accessories. Depending on the type of repair service needed, repairs can be performed at your facility or at Taylor's.

Everything you need to succeed
